

Library – Title and Artist not recognized

Symptoms:

Audio added to the Xtreme through the Import Audio folder doesn't have the title and artist recognized. The audio comes in as a 90000 cart number and doesn't recognize any of the information for the file.

Solutions:

The Digilink-Xtreme is capable of automatically recognizing audio information such as the Title and Artist from the files that are imported into the Xtreme. If the audio files that are being added are not having their Title and Artist information added, then it is not following one of these methods. The Title and Artist information can be recognized 1 of 2 ways:

1) MP3 V1 tag: Audio files have the ability to have tagged data appended to the audio file. This allows software to automatically recognize important information such as Title and Artist. The audio file must have a MP3 version 1 tag in order for it to automatically recognize the information. If the Xtreme isn't recognizing the Title and Artist information then it may be because it did not have the proper tagging.

2) File Name: The Digilink-Xtreme can recognize information such as title, artist, cart # and other information based on the audio file name. The audio file name simply has to be named in the proper format. For example, if you wanted to import the Beatles song "The Yellow Submarine" with a cart number of 1000A, then you could name the audio file:

1000A+The Yellow Submarine+The Beatles+.mp3
cart # + Title +Artist (text) +.mp3

The different fields are delineated with the '+' character. Another example is if you had an ad that you wanted to have a cart number of Jack100 with the Title as "Jacks Farming" and Text with "Nighttime Ad," and you want it to be a Type S spot, then you would name the audio file as:

Jack100+Jacks Farming+Nighttime Ad+S+.mp3

You can add more information to the file by putting more information into the file name. The format is:

Cart# + Title + Artist (Text) + intro time + extro time + Type + Start Date + Kill Date +0+ runtime+.extension (mp3/wav/mp2)

example: 1000+The Yellow Submarine+The Beatles+10.2+04.3+M+12_31_2000+12_31_2099+0+04_18_4+.mp3

See the instruction manual for more information.
