

Music Templates – Template repeats after break

Symptoms:

While using the Digilink-Xtreme music templates, and merging the template with the traffic file, the pattern for the music categories start over after each break.

Solutions:

In the 1.9 version of the software the Music Template pattern always starts over after a commercial break. So for a music template that is: Song 3, Song 5, Song J, Song N, it would follow this pattern:

Song 3
Song 5
Song J
Spotset Break
Song 3
Song 5
Spotset Break
Song 3
Song 5
Song J
Song N
Song 3
Spotset Break
Song 3

ect...

If you would like the music template to not restart after each break, then follow these instructions:

- 1) open the **C:** drive
- 2) open the **Arrakis** folder
- 3) open the **Xtreme** folder
- 4) open the **DigilinkSetup** folder
- 5) right click inside this folder and select New, Text Document
- 6) change the name of the text document to **Disable Music Reset.txt**
- 7) no text is required inside this text file. Restart the software

Once this is done, the Music Template pattern will not reset after each spotset break.
