

## Playlist – Plays 3 songs and a liner

### Symptoms:

The Digilink-Xtreme software will only play 3 songs and a jingle over and over. This happens when you click on the Start Automation button, even though you have a schedule setup on the Scheduler screen.

### Solutions:

The reason this is occurring is because the Random List Play feature is selected in the SETUP screen. To turn this off:

- 1) go to **MENU**
- 2) click on **SETUP**
- 3) uncheck the option **Random List Play**
