

Startup Failure – Error out of resources

Symptoms:

The system does not startup and displays the error: **Error out of resources**

The system then shuts off.

Solutions:

This error may be resolved by adding a text file to the **DigilinkSetup** folder. To do this:

- 1) go to the **C:** drive
- 2) open the **Arrakis** folder
- 3) open the **Xtreme** folder
- 4) open the **DigilinkSetup** folder
- 5) right click inside this folder and select **New, Text Document**
- 6) change the name of the text document to **librarysize.txt**
- 7) open the text file and on the first line type in **4001** (or a higher number if you require a larger library size)
- 8) click on **File** and then select **Save**
- 9) restart the software. The software should now open. If the software still displays the same error, it may be necessary to change the number in the **librarysize.txt** file to 6000
